This sagainst a backdrop of a challenging year for Letshego following unexpected changes in the Group's senior leadership team and new regulatory regimes in some of its markets. The focus for the year was on embedding the strategy to deliver positive performance through maintaining stability, cost control, improving portfolio collection quality and stabilising the effective tax rate. Satistactory progress was made in these areas that allowed forimprovements in profit before and after tax. The Group does recognise that the 2019 results benefited from a number of non-recurring items compared to 2018.

FINANCIAL PERFORMANCE REVIEW

FINANCIAL FERFORMANCE REVIEW of the year ended December 2019 was within expectations The Group's financial performance for the year ended December 2019 was within expectations Overall profit before tax increased by 11%, profit after tax by 35% and earnings per share by 41% Net income growth was however mutded as the focus was placed on improved portfolio quality.

NET INTEREST INCOME

forest yields on loans to customers, including related credit insurance arrangements, (2018: 34%). As expected gross yields continue to come under pressure, mainly competitive markets in which we operate.

Borrowing costs increased by 42% on the back of one off adjustments. The borrowing costs include a notional IFRS adjustment for mobile bars of P250 million (2018: P84 million). It this notional IFRS adjustment was excluded from borrowings, the increase year-on-year would be 19%.

This was due to the timing of when new debt was put onto or removed from the balance sheet - that is, most of the new debt was put onto the balance sheet in the second half of 2018 and some of the less expensive debt was repaid in early 2019 due to the facility reaching its contractual maturity. The overall blended cost of borrowings was 12.0% (2018: 12.1%). Focus has been, and will continue to be, on broadening the funding base, extending the tenor of debt funding and getting more local currency funding directly at the operating subsidiaries.

NON-FUNDED INCOME

NUN-FUNDED INCOME

Core non-funded income almost doubled on 2018 levels, closing at P59 million (2018: 31 million) or 2.4% (2018: 1.3%) of total net income. Early signs of progress are noted in the number of customers with active current or savings accounts with Letshego. Further, as shown below under the 'Deposit's section, progress has been made in the number of credit customers converting to transactional banking ("LetsGo") customers as well.

Operating costs increased by 6% and staff costs by 16%.

Operating expenses included a goodwill write-off of P38.7 million and impairment of cash balances of P6 million. If these are excluded, on a normalised based, operating expenses increased by

This reflects the greater focus on cost management during 2019. The Group's cost to income ratio was 45% (2018: 42%). This is above the target range of 35% to 40% and mainly due to modest growth in the loan portfolio as well as pressure on net interest margins.

The effective tax rate was 39% (2018: 50%), demonstrating progress towards the target range of 30% to 35%, as tax health and compliance is optimised.

- The factors that influenced the exceptionally high 2018 effective tax rate include:
 Specific tax provison for East Africa ,
 Increased dividend flows from subsidiaries leading to a higher withholding tax on these dividends, and
- Inter Group tax costs

The one off tax charge from an East African subsidiary did not re-occur.

The at-source withholding tax on dividend flows from subsidiaries is expected to remain part of the overall tax charge going forward, as higher dividend volumes are declared from subsidiaries to the holding company on the back of profitability.

Further initiatives to optimise the Group's tax structure are being explored.

Components of the Effective Tax Rate	2019	2018	2017
Baseline tax charge	31%	32%	29%
Specific tax provision (East Africa)	-	4%	-
Inter Group tax costs	8%	14%	3%
Effective tax rate	39%	50%	32%

LOAN PORTFOLIO In 2019, the Group prioritised improvement in asset quality. This resulted in a marginal decrease gross loans and advances to customers from the interim period to year-end. This initiative deliver an overall credit loss rate of 1.7% for the year against 4.1% in 2018, a significant improveme towards earnings quality. There were three onco-of freen included in the 2018 results.

- a specific credit provision in relation to a single entity in East Africa and a higher contribution to the impairment charge from the informal (mobile) loan segment in West

If the above were normalised out of the 2018 results, the credit loss rate would have been 2.0% (2019: 1.7%).

We continue with the application of IFRS 9 in 2019. Coverage ratios, being the amount of bad debt provisions we hold against loans to customers that are contractually above 90 days in arrears, were adequate at 105%. This was lower than the 2018 coverage ratio of 115% in reflection of the 2019 portion journity.

The informal (mobile loan) portfolio exposure in Ghana was deliberately reduced to mitigate portfolio risk. This portfolio is now P339 million at year end (2018: P507 million).

The core part of our credit offering to customers, deduction at source loans, contributed 88% of the overall loan portfolio (2018: 86%). Of our three largest markets, Botswana, Namibia and Mozambique performed well with net growth of 6%, 16% and 6% respectively.

Our micro finance portfolio declined by 1.5% in response to stricter credit risk assemicro finance portfolio makes up 8.5% (2018: 10%) of the overall portfolio.

Asset quality	2019	2018	2017
Portfolio at risk - 90 days	6.9%	7.1%	6.8%
Portfolio at risk - 30 days	10.0%	10.4%	9.9%
Non-performing loan coverage ratio	105%	115%	70%
Loan loss rate - actual	1.7%	4.1%	3.1%
Loan loss rate - excluding once-off items	1.7%	2.0%	2.5%

DePOSIT MOBILISATION

Overall deposits from customers reduced from P498 million to P427 million. During the year, following our strategic re-focus on mass retail deposit mobilisation, we were more selective in the institutional deposits accepted. This resulted in the value of institutional deposits reducing from P412 million The reduction in institutional deposits is expected to continue in 2020 as the focus on retail deposit mobilisation efforts intensity.

From a retail (individual) deposit perspective good progress was made. This included the number of retail depositor customers increasing from 173,074 to 402,298. Of these, 33,619 are also credit customers (2018: 63,983). The value of retail deposits was P215 million (2018: P85 million) Mozambique and Namibia made considerable progress in this area.

CAPITAL STRUCTURE, FUNDING AND DIVIDEND POLICY
Ratings Agency Moody's maintained Letshego Holdings Limited credit rating unchanged at Ba3
with stable outlook. The Group remains well capitalised with a CAR of 36% (2018: 33%) which
is well above the regulatory minimum in all of its operating countries. Despite high relience on
wholessle funding, significant progress has been made in diversification of the Group's funding
base away from the bank loan market through the issuance of local currency corporate bonds
in Botswana, Ghana, Mozambique and South Africa. The Group has also been successful in
refinancing maturing facilities and attracting new funding from specialist international investors
based in the UK and Europe with a focus or micro and inclusive finance funders. The new funding
has enabled the Group to better manage its debt maturity profile and liquidity position. The
Group recognises the importance of diversifying its funding mix and building deposits to mitigate
refinancing risk.

The Group has complied with all of its financial covenants for senior secured lenders as set out in the Security Sharing Agreement. All interest and capital debt payments were honoured during the year.

The Board has reviewed the Group's dividend policy and has determined to reinstate the dividend up to 50% of profit after tax. This follows the stabilisation of the debt to equify levels at the current base. The 50% dividend is based on the profit after tax for the six months ended 31 December 2019 of P328 million.

No shares were repurchased during the year, with no immediate plans to do so in 2020.

A comprehensive review is underway with the appointment of the new Group Chief Executive. This is at a geographic, product and channel level. The Board will keep shareholders apprised of developments.

PROSPECTS
The Board expects the company's financial fundamentals to remain robust. Over the immediate 12 to 18-month horizon, the key risks to the business will continue to come from changing economic fundamentals across our regional footprint and margin contraction in select markets, in particular in Namibia, due to changes in regulations relating to insurance and pricing. Despite these risks, we target to grow Group Net Advances to customers above 10% year-on-year, in line with improving starcholder returns.
